Kwandumusa Mthethwa

Social Media Content Creator · Short-Form Video Producer

kwandumthethwa08@gmail.com | +27 79 187 9707 | South Africa — remote, UTC+2
jaymthethwa.co.za | @realjaycoding — TikTok · YouTube Shorts · Instagram

PROFILE

Short-form content creator and producer who writes, films, edits and publishes tech-education and youth-empowerment video for a global English-speaking audience. I own the full pipeline — strategy, hook writing, scripting, edit and posting — and work to a repeatable seven-layer scripting framework rather than one-off ideas, currently shipping 6–7 videos a week across three platforms. Also a software developer and co-founder of a four-person dev studio, DAC Technologies, which means I can create credible technical content and build the tooling around it. Comfortable with sponsor review cycles, brand guidelines and fully async remote work.

CORE SKILLS

Content strategy Pillar design, content calendars, hook libraries, KPI tracking

Video editing CapCut — cuts, captions, transitions, pacing for 9:16

Platforms TikTok (incl. LIVE), YouTube Shorts, Instagram Reels, Substack

SEO & discovery Keyword placement across audio, on-screen text and captions

Scriptwriting Short-form frameworks, retention hooks, narrative engagement loops

Design Canva — thumbnails, on-screen graphics, promotional assets

Programmatic video Remotion, HeyGen for templated and automated edits

Remote working Async comms, sponsor approval workflows, self-managed delivery

EXPERIENCE

Founder & Content Creator — Real Jay Coding (@realjaycoding)

2024 – Present

- Built and run a tech-education and youth-empowerment content brand across TikTok, YouTube Shorts and Instagram, growing to 16,000 followers and 1.1M total views.
- Developed a seven-layer short-form scripting framework and a four-step engagement loop (stakes → big question → head fake → rehook); wrote 30+ scripts across multiple series using it.
- Structured the channel around three content pillars — developer education, South African youth empowerment, and build-in-public product content — and ship 6–7 posts per week against a planned calendar.
- Planned and executed a 28-video production cycle (one video per day over four weeks), covering ideation, scripting, filming, editing and scheduling solo.
- Host TikTok LIVE sessions including a recurring “Portfolio & CV Roast” format built to drive audience participation and retention.
- Run supporting owned channels: a self-improvement Substack newsletter (102 subscribers) and a portfolio site whose lead magnets have captured ~130 email subscribers.

Content Producer & Scriptwriter — Zaio

Nov 2025 – Oct 2026

- Produced short-form educational and course-promotion content for Zaio, a South African coding-education platform, working to the brand’s audience and messaging.
- Wrote multi-video series on developer topics — framework paralysis, Git, AI tooling, portfolio building — translating technical material into beginner-accessible short-form scripts.

Sponsored Content Producer — Chatbox AI (brand collaboration)

2026

- Secured and negotiated terms for a paid brand collaboration with an AI productivity app, agreeing deliverables, usage rights and a 180-day live period.
- Produced the full asset — outline, script, filming and edit — through the sponsor’s staged review process, incorporating feedback at each approval gate.

COMMUNITY

Iqembulamanzi NPC — contributor to a student-founded non-profit based in eMalahleni, South Africa

EDUCATION

Diploma in Computer Science — Tshwane University of Technology · second year

Expected 2028

Coursework: Software Engineering Fundamentals, Advanced Object-Oriented Programming, Operating Systems, Information Security
