EDUCATION

TSHWANE UNIVERSITY OF TECHNOLOGY

COMPUTER SCIENCE DIPLOMA (EXTENDED)

Percentage: 72.67%

January 2024 - Jun 2027
eMalahleni, Mpumalanga, South Africa

GUDUZA SENIOR SECONDARY SCHOOL

GRADE 12 - NATIONAL SENIOR CERTIFICATE

January 2023 - November 2023

FREECODECAMP

JAVASCRIPT ALGORITHMS & DATA STRUCTURES CERTIFICATE

April 2025 - Present
San Francisco, California (Remote)

ZAIO INSTITUTE OF TECHNOLOGY

FULL STACK AI ENGINEERING CERTIFICATE

January 2026 - Present
Woodstock, Cape Town

EXPERIENCE

ZAIO INSTITUTE OF TECHNOLOGY | TECH CONTENT CREATOR

Remote | November 2025 – Present

I create tech education and youth empowerment content under the Zaiio brand, producing short-form videos across TikTok, Instagram Reels, and YouTube Shorts. My focus is making programming and career development accessible to South African students and young developers through engaging, peer-to-peer storytelling.

SKILLS

PROGRAMMING LANGUAGES

LIBRARIES/FRAMEWORKS

TOOLS / PLATFORMS

DATABASES

Java, JavaScript, CSS, HTML, Python, Oracle SQL

JavaScript, React

GitHub, VS Code, IntelliJ Idea, Eclipse IDE, Microsoft Suite, Supabase

SQL, PostgreSQL, Supabase

PROJECTS / OPEN-SOURCE

BANK | [LINK](#)

Java

MultiAccount Banking System (Java CLI)

Designed a command-line banking system in Java that lets users create and manage multiple accounts. Implemented secure account access via account number and PIN (with three-strike lockout), ability to switch between accounts, and core banking operations: deposits, withdrawals, balance checks, and transaction history per account. It also calculates user age from birthdate and offers coupon options during account creation. Built with Java, robust input validation, and session-based account handling via object-oriented design.

ATM-SIMULATOR | [LINK](#)

Java

ATM Simulator (Java CLI)

Developed a command-line ATM simulation in Java to mimic essential banking tasks: account setup with PIN, balance checks, deposits, withdrawals (with validation), and PIN management. Ensuring realistic constraints like withdrawal limits, PIN security, and transaction tracking. Utilized `java.util.Scanner`, `java.util.Random`, and robust input/error handling in a session-based environment.

90-DAY-JOURNAL | [LINK](#)

TypeScript, CSS, JavaScript, HTML

The 90-Day Journal solves the accountability gap that causes most people to abandon personal goals before seeing real results. Built for individuals committed to a structured self-improvement journey, it combines vision setting, daily logging, and milestone reviews with a social layer that lets friends track each other's progress. Built with React 19, TypeScript, Tailwind CSS 4, and Supabase.

MY PORTFOLIO | [Link](#)

TypeScript, CSS, HTML, JavaScript

The Developer Portfolio solves the problem of a static, hard-to-maintain online presence for developers who want to showcase their work professionally. It provides a dynamic, admin-managed portfolio site with polished animations and a premium UI, built with React 18, Tailwind CSS, Shadcn UI, Framer Motion, and Supabase, deployed seamlessly on Vercel.

THE HIVE | [Link](#)

TypeScript, PLpgSQL, CSS, JavaScript, HTML

The Hive solves the lack of a safe, structured online learning environment for teens by giving them access to guided courses, progress tracking, badges, and moderated community features without the risks of unmoderated adult interaction. Built with React, TypeScript, Supabase, and Tailwind CSS, it ships with a fully seeded demo mode for instant evaluation.

CERTIFICATIONS

- Responsive Web Design - **FREECODECAMP**
- Data Science Tools - **COGNITIVE CLASS BY IBM**
- Data Science 101 - **COGNITIVE CLASS BY IBM**

HONORS & AWARDS

- Received 3rd Place in Mpumalanga Artificial Intelligence Student Hackathon (MAISH)
